FCTA - BUILDING CAREERS

FLEXIBLE CONSTRUCTION TRAINING & ASSESSMENT

Fibrous moulded plasterwork is considered to be the most interesting and rewarding branches of the industry. This course equips the student with the high level of 'hands-on' instruction that this type of plasterwork demands. This provides students with the opportunity to become familiar in a specialist trade that is both sought after and well rewarded.

On this course we will teach you the advanced practical skills required to be able to produce fibrous moulds and to produce a quality finish for prestigious buildings.

THE COURSE WILL COVER:

- The fixing of decorative cornice and ceiling roses
- Restoration of ceiling rose & repairs to existing plasterwork
- Matching and continuity of patterns on decorative cornice
- Setting out a room and installing moulded plasterwork
- Various other aspects of craftsmanship not usually taught in any accredited modules
- Making of a cornice mould
- Preparing the mould and taking a casting
- Fix and flushing,
- Cutting
- Installation and scribing
- Use of small tools, mitres
- Running in situ or bench
- Cutting
